Introduction

This report contains statistical estimates of upland game bird hunting effort and harvest success in Montana during license year 1997 (LY97). It is based on an analysis and summary of the statewide upland bird hunting and harvest survey conducted following the LY97 hunting season (see **Survey Questionnaire** enclosure). Information on sampling effort, return and response rates, and survey results are presented below. Estimates of the number of hunters and successful hunters, hunter days, and total harvest, plus confidence bounds at the 80% significance level and relevant ratios based on these statistics, are presented by upland game bird species hunted (separate and combined), location hunted (statewide, regional, and by county), and type of bird license held by the sportsperson (license type, licenses combined by residency, and all license types/residencies combined).

Two upland game bird table types are presented:

1. **Upland Game Bird Hunting and Harvest Table:** Estimated number of bird hunters, successful hunters, hunter days, total harvest, and ratios based on these estimates. Also presented is the percent distribution of successful hunters within 6 bag size classes.

2. **Upland Game Bird Statistical Confidence Table:** The same four basic estimated statistics presented above (Hunters, Successful Hunters, Hunter Days, Total Harvest) accompanied by their lower and upper 80% confidence bounds.

These tables are organized based on three variables: Species, Location, and License Type.

1. **Hunted Upland Game Bird Species:**

- **All Species Combined**
- **Pheasant**
- **Hungarian Partridge**
- **Chukar Partridge**
- **Sharptail Grouse**
- **Sage Grouse**
- **Ruffed Grouse**
- **Blue Grouse**
- **Spruce (Franklin's) Grouse**
- **Unknown Species**

Due to space limitations in the tables, Partridge may be abbreviated as P and Grouse as G. If no hunting was reported for a species in a location, no record will appear in the summary table.

2. **Location of Hunt:**

- **Statewide (State):** Indicates that statistics are computed without regard to County of hunt and provides an overall picture of upland bird hunting in Montana.
- **Regional (Reg 1...Reg 7, Reg U):** Statistics are computed based on MFWP Region of the County hunted. Hunting reported in an unknown County is lumped into Reg U.
- **County:** Statistics are computed based on County of hunt. Counties are organized alphabetically within Regions. No attempt is made to screen out data reporting hunting of upland game bird species in Counties where their presence is unlikely. Reported location data are presented ***as is*** so Regional managers and biologists will have the opportunity to interpret it for themselves.

3. **Upland Game Bird License Type Held by Sportsperson:**

- **All:** Statistics are computed without regard to the upland bird license held by sportspersons.
- **Residency (R/N):** Statistics are computed based on residency status of sportsperson.
- **License Type:** Statistics are computed based on type of upland bird license held.

    - **R Bird:** Sportspersons holding a standard **Resident Upland Game Bird License** (types 14 and 52).
    - **R Spo 09:** Sportspersons holding a **Resident Sportsman (without Bear) License** (type 09).
    - **R Spo 11:** Sportspersons holding a **Resident Sportsman (with Bear) License** (type 11).
    - **N Bird:** Sportspersons holding a standard **Non-resident Upland Game Bird License** (type 22).
    - **N Com BG:** Sportspersons holding a **Non-resident Big Game Combination License** (types 83, 84).
    - **N Com DE:** Sportspersons holding a **Non-resident Deer Combination License** (types 85, 86, 87).

Following the convention used in past years, those **hunters holding upland game bird hunting privileges based only on age or disability status** in combination with a conservation license, and not holding conservation license types 09, 11, 83, 84, 85, 86, and 87, or bird license types 14, 22, and 52, **were not included** in the surveyed population of bird hunters, nor were their numbers used to compute expansion factors for bird hunting and harvest estimates. Including these sportspersons could potentially add significant numbers of fisherpersons or hunters of other game species who have little or no intent to hunt upland game birds.

Expansion Factors for Upland Game Bird Statistics

All statistics presented are estimates based on the underlying upland game bird survey response set for a particular combination of the various levels of Species hunted, Location hunted, and License Type held. Upland game bird expansion factors were derived for each License Type based on the population of holders of that License Type divided by the number holders returning survey responses for that License Type. Statistics at the Residency level lump License Type holders and respondents by Residency status, resulting in statistical estimates of hunting and harvest without regard to underlying License Type within Residency class. Statistics at the "All" License Types combined level lump all holders regardless of Residency status, resulting in estimates without regard to Residency or License Type. The sum of underlying harvest estimates for the individual License Types will not necessarily equal the estimate for the corresponding Residency class, nor will the sum of the two estimates by Residency necessarily equal the estimate for the "All" License Types category.

Estimates of Hunters and Successful Hunters by Species will not sum to the "All" Species estimate because an individual hunter may hunt and harvest more than one species. Estimates of Hunter Days and Total Harvest will sum across Species to the "All" estimate because hunters report days and kill by individual species, and the same expansion factor is used to obtain the estimates for all Species for a given License Type Class.

Similarly estimates of Hunters and Successful Hunters by County will not sum to the corresponding Regional or Statewide estimates because an individual hunter may hunt and harvest in more than one County and Region. The Hunter Days and Total Harvest estimates will sum across locations because hunters report days and kill by County, and the same expansion factor is used to obtain the estimates for all Locations for a given License Type Class.

Overall Sampling Effort and Results

Montana resident upland game bird sportspersons were surveyed primarily by phone, while non-residents were surveyed by mail. **Table 1** presents overall statewide counts of upland game bird sportspersons, sampled sportspersons, and sportspersons who provided valid responses, by the various License Type categories described above. Expansion factors, sportspersons divided by sportspersons returning valid responses, are also presented. Expanded statistics were computed at all levels of Species, Location, and License Type by multiplying the non-expanded statistics by the expansion factor of the matching License type. The estimated number of active upland game bird hunters is derived from the number of responses where the hunter indicated bird hunting effort, multiplied by the corresponding expansion factor for the License Type.

Table 2 presents the various rates derived from the counts in Table 1, expressed as percents. **Sample rate** is the percent of game bird sportspersons that were surveyed for game bird hunting and harvest information. **Return rate** is the percent of surveyed game bird sportspersons who returned valid game bird survey information. **Response rate** is the percent of game bird sportspersons who returned valid game bird responses. **Hunting rate** is the estimated percent of game bird sportspersons expending effort hunting upland birds.

Upland Game Bird Hunting and Harvest Tables

The upland game bird Hunting and Harvest Tables present basic game bird hunting and harvest statistics, and ratios based on these statistics, for various levels and combinations of Species hunted, Location hunted, and License type held. These tables are organized as follows:

- **By Species**
  - **State and Regional, All License Permit Types Combined**
  - **By County, All License Permit Types Combined**
  - **State and Regional, by License Permit Type**

- **All Species Combined**
  - **State and Regional, by License Permit Type**
  - **By County and Residency**

To compare statistics between Species and Locations, without regard to License Type, refer to the "By Species, State and Regional" or "By Species, by County" tables. To compare results between Regions and Residency/License Types, for a given Species, refer to the "By Species, State and Regional, By License Type table. For an overall view of all upland game bird hunting, without regard to Species, refer to the "Species Combined" tables.

The following statistics were computed for all Species, Location, and License Type level combinations:

- **Hunters:** Point estimate of number of sportspersons (tag holders) that actively hunted.
- **Success Hunters (Successful Hunters):** Point estimate of number of hunters that harvested one or more game birds.
- **Hunter Days:** Point estimate of number of days or partial days hunters spent hunting for game birds.
- **Total Harvest:** Point estimate of total number of birds harvested.
- **Percent Success:** Number of successful hunters divided by number of hunters. An estimate of the percent of hunters harvesting one or more upland birds.
- **Days Per Hunter:** Number of hunter days divided by number of hunters. An estimate of the average number of days a hunter spent hunting upland birds.
- **Kill Per Hunter:** Total harvest divided by number of hunters. An estimate of the average number of upland birds harvested by hunters, including unsuccessful hunters.
- **Kill Per Day:** Total harvest divided by number of hunter days. An estimate of the average number of birds harvested per day hunted.

In addition, the percent of successful hunters by bag size class was calculated:

- **Bag Sz 1:** Percent of successful hunters harvesting 1 game bird of a given species at a given location.
- **Bag Sz 2:** Percent of successful hunters harvesting 2 game birds of a given species at a given location.
- **Bag Sz 3:** Percent of successful hunters harvesting 3 game birds of a given species at a given location.
- **Bag Sz 4-6:** Percent of successful hunters harvesting 4 to 6 game birds of a given species at a given location.
- **Bag Sz 7-9:** Percent of successful hunters harvesting 7 to 9 game birds of a given species at a given location.
- **Bag Sz >9:** Percent of successful hunters harvesting more than nine game birds of a given species at a given location.

Upland Game Bird Statistical Confidence Tables

The upland game bird Statistical Confidence tables present point estimates of the basic statistics described above, but also provide the lower and upper 80% confidence bounds on these estimates. These supplemental tables are provided on the principle that point estimates should always be judged in the light of the variability expected in the estimate. This variability is reflected in the confidence bounds provided for the estimate. Statistical confidence tables are provided in the following views:

- **By Species**
    - **State and Regional, by License Permit Type**
    - **By County, All License Permit Types Combined**

- **All Species Combined**
    - **State and Regional, by License Permit Type**
    - **By County and Residency**

Statistics provided include:

- **Hunters:** Point estimate of number of sportspersons (tag holders) that actively hunted.
- **Hunters Low Bnd:** Lower bound of 80% confidence interval on number of hunters.
- **Hunters Up Bnd:** Upper bound of 80% confidence interval on number of hunters.
- **Success Hunters (Successful Hunters):** Point estimate of number of hunters that harvested one or more birds.
- **Suc Hunt Low Bnd:** Lower bound of 80% confidence interval on number of successful hunters.
- **Suc Hunt Up Bnd:** Upper bound of 80% confidence interval on number of successful hunters.
- **Hunter Days:** Point estimate of number of days or partial days hunters spent hunting for game birds.
- **HDays Low Bnd:** Lower bound of 80% confidence interval on number of hunter days.
- **HDays Up Bnd:** Upper bound of 80% confidence interval on number of hunter days.
- **Total Harvest:** Point estimate of total number of birds harvested.
- **Harvest Low Bnd:** Lower bound of 80% confidence interval on total harvest.
- **Harvest Up Bnd:** Upper bound of 80% confidence interval on total harvest.
